Homework: Association Rules

Read the Wikipedia page about Association Rule Learning and answer the following questions:

- How can the *support* of an association rule be computed and what does it represent?
- How can the *confidence* of an association rule be computed and what does it represent?
- What is the confidence of an *implication*?

In the next week,

- you will answer these questions in the lecture,
- we will consider *bases* of association rules.
